EDUCATION

Loyola-ICAM College of Engineering and Technology

Bachelor of Technology in Information Technology; CGPA: 8.87

Chennai, Tamil Nadu

October 2022 - April 2026

Napac Matric Hr.Sec School

Higher Secondary Certificate(HSC); Percentage: 95.5

Mayiladuthurai, Tamil Nadu

May 2022

SKILL SUMMARY

- **Languages:** Python, Java, SQL, HTML/CSS, JavaScript, TypeScript
- **Frameworks:** React, Flutter, React Native, Pandas, NumPy, Matplotlib
- **Tools:** Playwright, Tableau, MySQL, Figma
- **Soft Skills:** Rapport Building, Good Communication

WORK EXPERIENCE

AUTOMATION TESTING INTERN | TECH MAHINDRA | [LINK](#)

January 26 - February 26

- Developed and executed automated test scripts to validate the functionality of website called "OrangeHRM".
- Used Playwright, an automation testing framework, to automate browser testing across different environments.
- Developed test suites that replicate actual user interactions, including form submission, navigation, and UI validation.
- Used GitHub Copilot, an AI coding assistant, to produce optimised test code, increase productivity, and speed up script development.

DATA ANALYST INTERN | TVS NEXT | [LINK](#)

June 25 - July 25

- Analyzed structured datasets to identify patterns, trends, and meaningful insights.
- Created interactive charts, graphs, and dashboards using Tableau Public.
- Transformed raw data into visual representations to make complex data easier to understand.

PROJECTS

Finalysis - Finance Dashboard UI | [LINK](#)

March 26 - April 26

- Built a finance dashboard using React, TypeScript, and Tailwind CSS for tracking income and expenses.
- Created interactive charts with Recharts for real-time financial insights.
- Used Context API for state management with CRUD, search, and filtering features.
- Designed a responsive UI with dark/light mode and data persistence.

Website Replication | [LINK](#)

January 26 - February 26

- Developed a front-end replica of the Finsire website UI using ReactJS.
- Implemented component-based architecture in React, breaking the UI into reusable components such as Navbar, Home, Blog, Media, and About sections.
- Used navigation logic to simulate multiple pages within a single-page application.

Financial Transaction Fraud Detection | [LINK](#)

January 26 - March 26

- Built a Financial Fraud Detection system using One-Pass Online Learning, a machine learning approach where transaction data is processed only once as it arrives.
- Implemented an incremental learning model that updates itself whenever new transaction data is received, eliminating the need to store the entire dataset.
- Utilized machine learning algorithms such as Stochastic Gradient Descent (SGD) which support online learning and fast model updates.
- Built the system to analyze multiple transaction features to identify suspicious or fraudulent activities.

CERTIFICATES

Web Development Fundamentals (IBM) | [BADGE](#)

April 2026

- Gained foundational knowledge of web development using HTML, CSS, and JavaScript, along with responsive design and deployment basics.

Oracle Certified AI Foundations Associate (Oracle) | [CERTIFICATE](#)

March 2026

- Introduced to foundational concepts of Artificial Intelligence and Machine Learning with a focus on their practical applications in Oracle Cloud Infrastructure (OCI).

The Complete Ruby on Rails Developer Course (Udemy) | [CERTIFICATE](#)

June 2025

- Learned about full-stack web development using Ruby on Rails, including building, deploying, and managing web applications.
